PROFESSIONAL SUMMARY

Full Stack Developer and Security Analyst who both builds production web systems and defends them. Two years across full-stack development (React, TypeScript, Laravel, Node.js) and security operations (SIEM monitoring, incident response, malware forensics). Currently a Security Operations Center Analyst at the Armed Forces of the Philippines and Lead Full Stack Developer at VibeHive Digital Services. Delivery across FinTech, E-Commerce, and defense, with a track record of shipping fast and hardening what ships.

PROFESSIONAL EXPERIENCE

Armed Forces of the Philippines | *Security Operations Center (SOC) Analyst* • **Present** Apr 2024 – Present

- Real-time threat monitoring and incident response using Wazuh SIEM, Suricata IDS, Malcolm, and Wireshark.
- Produce formal, classification-controlled shift reports with executive summaries, alert disposition tables, and telemetry analysis.
- Led a forensic incident response investigation into a malicious Windows LNK file, delivering a full IR package with IOC mapping and remediation.
- Built Node.js automation that generates structured security reports from SIEM CSV exports, replacing manual compilation.
- Coordinate with engineering and operations teams on infrastructure hardening and remediation.

VibeHive Digital Services | *Lead Full Stack Developer* (Part-Time / Freelance) • **Present** Aug 2025 – Present

- Lead design and development of conversion-focused, full-stack web systems using React, TypeScript, Framer Motion, GSAP, and Laravel.
- Delivered 10+ client projects on schedule; improved overall application performance by ~30%.
- Own secure API design and access-controlled application logic across the stack.

iAm TechSolution | *Full Stack Website Developer* Sept 2024 – Aug 2025

- Led system design and full-stack development, cutting deployment times by 25%.
- Managed API development for 5+ large-scale projects, boosting system efficiency by 40%; 95% on-time delivery.

Bizolve | *Web Designer* Mar 2022 – Sep 2022

- Designed 20+ websites on the ODOO platform, increasing client satisfaction scores by 35%.

SECURITY & OPEN-SOURCE WORK

- Vulnerability research: discovered a zero-interaction vulnerability class in an open-source XMPP client (Cheogram) during authorized lab research; validated impact and disclosed responsibly.
- Bug bounty: active participant on a public program via a coordinated-disclosure platform (recon, discovery, responsible reporting within scope).
- CTF competitor across HackTheBox and academic events: web exploitation, forensics, steganography, OSINT.
- Personal builds: Laravel honesty-store web app; Python election-results data scrapers; Cyber Kill Chain educational video.

EDUCATION

Technological Institute of the Philippines Aug 2020 – Sep 2024

Bachelor of Science in Information Technology

GWA: 1.43 (Major) 1.51 (Cumulative) • Cum Laude • President Lister • Scholar

Our Lady of Fatima University – Antipolo Campus Aug 2018 – May 2020

Science, Technology, Engineering and Mathematics (STEM) Strand

Dean's Lister • Scholar

TECHNICAL SKILLS

Languages: JavaScript & TypeScript (Expert) • PHP (Expert) • Python • C# • C++ • Java • Lua • R • Bash

Web: HTML5 • CSS3 • React.js • Node.js • Angular • REST APIs • Framer Motion • GSAP • Vite

Databases & Cloud: MySQL • PostgreSQL • MongoDB • MSSQL • AWS (EC2, RDS, Cloudflare) • GCP

Security & Ops: Wazuh SIEM • Suricata • Malcolm • Wireshark • Burp Suite • Metasploit • nmap • Kali Linux • Incident Response

Infrastructure & Tools: Docker • Kubernetes • Proxmox • Nginx • Git • Agile/Scrum • Figma • N8N
